

Which of the following statements best describes your overall feeling about returning to school?

My children will return to school with no reservations.

Any chance of learning in a social environment is better than nothing

Anything in a classroom is a better learning experience for children of All ages

Based on what has been presented to date, I am concerned for a lack of learning, accountability and education/teaching opportunities for the students.

Children need to return to school ! Precautions of course are understandable and expected... but physical attendance, daily, is in my opinion the best.

Children should return to the in class setting. Continue to stress handwashing and disinfect surfaces. This is droplet precautions just like the flu is.

Children will return as I trust the district will take proper cautions to my children returning however I do feel social interactions is necessary and facemasks are a distraction.

Cleanliness and sanitation is important, but I am not worried about the spread of covid any more than other viruses (such as flu)

Face coverings should be worn but removed when seated

Face coverings when not 6 ft away

For my child to return to school, he needs adequate learning and teaching opportunities within a safe environment.

Full time encouraging hand wash and staying home if ill.

Get back to routine...face covering will not work with children.

Hand washing and as much social distancing but my 4 year old won't wear a mask ALL day.

Hand washing and social distancing but I think to ask small children to wear masks during the school day will not be successful.

He will be there

He will be there

I am not okay with having approx 40 kids together(6th grade) in a gym with recirculated air and no face masks on the children

I am not sure at this point. It all depends on the numbers in our community.

I am okay with return - do not want my child wearing mask all day

I believe that there should be some type of face coverings at certain points in the day. Such as walking through the halls. I do not think children should have to wear masks at their desks or during lunch time.

I can not support these kids having to wear face masks all day long. I want them to return and implement hand washing and extra sanitation but no masks.

I do not feel comfortable sending my child.

I dont want my children returning until it goes away

I fee very strongly that my children need to attend school. I trust the district to make sure they are safe while they attend, whatever that looks like.

I feel Chau Cty has not been affected all that much. I wld b okay with no face coverings.

I feel the advantage of school is the socialization and interaction between individuals. That being said, with the current restrictions, i do not see a great benefit over the remote instruction.

I just wonder if going back is going to be any better? I want the personal one on one for my children but with all the CDC guidelines I worry how much educationally they will be getting while risking their health. I think most kids are going to be kind of traumatized coming back to extreme covid

I think masks will make the children touch there face more.

I want my child to have the closest "normal" senior year possible.

I want my child to return to the school building while using precautions.

I want my children to return but have many reservations.

I want to students/children to return to school if it is considered safe and the number of infections don't keep increasing.

I would like my child to return to school but I am concerned about face coverings if students have to wear them for the entire time they are in the building. Many classrooms are extremely hot and I do not feel that is a healthy environment.

I would love for them to return but how does that work if they have asthma and mask wearing? I do like the hand washing constantly idea...

I'm completely fine with it

I'm not crazy about them having to wear a mask and breath CO2 half the day. I think it's very important that these kids get back to School. I just want her back in School.

I'm not crazy about them having to wear a mask and breath CO2 half the day. I think it's very important that these kids get back to School. I just want her back in School.

I'm not crazy about them having to wear a mask and breath CO2 half the day. I think it's very important that these kids get back to School. I just want her back in School.

I'm not crazy about them having to wear a mask and breath CO2 half the day. I think it's very important that these kids get back to School. I just want her back in School.

I'm not happy about them having to wearing a mask and breathing in their own carbon dioxide all day. Social distancing and hand washing should be a priority.

I'm not happy about them having to wearing a mask and breathing in their own carbon dioxide all day. Social distancing and hand washing should be a priority.

I'm ok with social distancing, and hand sanitizers

I'm ok with social distancing, and hand sanitizers

If my child was not in a gym for class and in a regular classroom in the elementary, I would feel more comfortable. I trust that the district will be following the cleaning and distancing guidelines.

Kids need to be back in school

kids need to go back to school home schooling is to hard for working parents

my children will return with a healthy balance of education, safety, and ability to have social interactions with others

My child can return to school as normal

My child needs to be IN school if she is going to continue to grow.

My child will do what is determined to be the best option by the school board

My child will only return when there is a vaccine that is proven to be effective and safe

My child will return either way, she wants to finish up her senior year and graduate.

My child will return following whatever guidelines are required by the district.

My child will return if social distancing, hand washing is enforced. Remote learning would be preferable though

My child will return if the building is open, no matter what.

My child will return in any capacity allowed

My child will return regardless

My child will return to school

My child will return to school as long as it is open.

my child will return to school as per NYS requirements, not necessarily face coverings as a requirement but if NY says they must wear face coverings, hand wash and social distance it should be enforced

My child will return to school regardless.

Which of the following statements best describes your overall feeling about returning to school?

- My child will return to school whatever that looks like
- My child will return to school when he is not required to wear a mask.
- My child will return under what ever guide lines you seem fit
- My child will return.
- My child(ren) will return only if face mask on going into school(able to take off in class) and hand washing.
- My Children can return to school...no if's required!!!
- My children need to return to school
- My children need to turn to school for their education. Doing this at home is not good for them emotional and socially and academically.
- My children will attend if open
- My children will come what ever is needed
- My children will return and abide by requirements.
- My children will return as long as all Department of Health mandates are met
- My children will return as long as CDC recommends it
- My children will return face masks are unacceptable our kids need school and teachers teaching them and all it
- My children will return no matter what. I'd hope they could return without face coverings and the mental effects of being avoided and being forced to stay away from other kids.
- My children will return regardless of any requirements.
- My Children will return to school
- My children will return to school as long as face coverings and handwashing are enforced. As I know proper social distancing may not be a viable option.
- My children will return to school even if the above are not required
- My children will return to school even if the above are not required
- My children will return to school or daycare of some nature because we both work full time. We want to make the best and safest choices for our children as well.
- My children will return to school with or without above enforcements.
- My children will return to school.
- My children will return when the threat of covid passes.
- My children will return with a safe plan
- My children will return with hand washing and social distancing. Masks only if they cannot social distance
- My children will return, with effective precautions in place and safety measures taken appropriate to data available at the beginning of the school year.
- My children won't return until they can have a normal school life
- My children would return as long as the school has done what it feels safe
- My kids can return as normal.
- My special needs child needs to return to school
- Nervous my kids will contract the virus . Nervous about my child having to wear face covering due to her asthma , worried about the kids having to sit in one spot all day for classes and meals .
- No masks social distancing
- None
- Open up the school fully
- physical attendance for social and mental wellness.
- Prefer my children to return to face to face teaching .
- remote learning is best for our family
- Remote only
- Return as normal
- Return regardless
- Return regardless
- return without restrictions
- Return, use masks when away from personal desk similarly as restaurants are requiring currently
- Returning
- School should not be required either in person or at home until a vaccine is available
- Send back no masks as normal
- Social distancing not necessarily face coverings while at their desks and 6 feet apart
- The governor, based on science, recommends it is safe
- the number and severity of Covid cases remain low and the benefits outweigh the risks for attending school in person
- They need to get back to a somewhat normal routine even if its every other day.
- This is a tough decision without knowing exactly what is happening at school and what other families are doing at home and when they are in public. I expect some requirements likes masks and social distancing to be in place, but we are talking about some 4 year olds. I would LOVE for my
- This will depend on what the numbers are looking like in September. Not completely comfortable yet.
- Uninhibited
- Unsure at this time
- Unsure at this time. Leaning towards the "Click" option but just not certain.
- Very Nervous about everything
- Virtual or cyber option
- We will follow state mandates
- We will return assuming face masks are not required while in the physical classroom.
- What ever is recommended
- What ever is recommended

Which of the following statements best describes your overall feeling about returning to school?

Whatever options are available

Will only return if safe, i dont believe we will be safe by sept. Our area has been very lucky so far. However our cases are rising fast, being on the front lines of this i see the real dangers and realize how hard it is to safely sanitize during the day. Its almost impossible to do this with a school c

Will return as long as NYS protocols are followed by the District

Will return even without mask

Will return with whatever plan is devised by the school.

Will return. Prefer no face coverings for kids
